## Skill Development Program

P.D.M. College of Pharmacy in association with Mr. P.K. Gupta, Chairman, Belco Pharma has initiated specialised Vocational Training Program in Pharmaceutical sector viz. Production, Chemist, Quality Control Chemist, Quality Assurance Chemist and Medical Sales Representative. The Main Agenda is to develop a curriculum for the skills training, helping in placement of trained and skilled workforce in Industry. The Training Program will help students to attain Technical Expertise, soft skills and supervising skills for effectively producing sustainable and quality products that meet regulatory requirements.

Various Objectives of skill development program is to Increase Productivity of existing workforce and fill the skill gap in Pharmaceutical Industry, standardizing the training and certification to needs of the country and initiate a process of creating a registry of skills, Boost productivity and Employability of youth. Students will be provided Theoretical as well as practical exposure to develop their technical skills. Basic Objective of holding such seminars is to make students at PDMCOP a step ahead by providing them Practical as well as Theoretical Industrial Knowledge.

# Quality Water System for Pharmaceutical use

Presented By : P. K. GUPTA  
BELCO PHARMA

On 5<sup>th</sup> of February, Mr. P.K. Gupta delivered his first seminar on the topic of “Quality water System for Pharmaceutical use” under the Skills Development Program. Mr. Gupta started his speech by putting some light on success and Mantra to achieve it. Further Mr. Gupta introduced students to his Personal Life experience in dealing problem of importing water in Bahadurgarh.

He further described Various types of water used in industries such as Portable Water, Purified water

and Water for Inject able. He briefed students step by step purification process for portable water by a diagrammatic representation.

He also added that they have been using Micro Filters and UV radiations to control Bacterial and Fungal Growth in water. Mr. Gupta also gave a brief introduction about multiple tests that water is supposed to pass before using it in multiple formulations. It has been a learning experience for Students of B.Pharm (Third and Fourth year) as well as M.Pharm (First and Second year) who took active participation in Seminar by asking their queries during and after the seminar.

Vote of thanks was given to Mr. Gupta by Principal Ma'am for tremendous efforts he has been putting by sharing valuable knowledge that only an experienced person can give.
